PROFILE SUMMARY

Experienced App development with 3.3 years of hands-on experience in building user-centric Android applications using Kotlin, Java, and Jetpack Compose. Skilled in designing, developing, debugging, and maintaining advanced Android applications. Passionate about delivering scalable, high-performance solutions in both collaborative team environments and independent settings.

EXPERIENCE

Maxworth Electronic Systems Pvt. Ltd.

July 2023 Present

Android Developer

New Delhi

- **Tata Steel Limited** (60 days)
Built Android app for pipe quality testing & traceability using RFID.
Developed dashboards for real-time monitoring. (*Kotlin, Retrofit, Zebra SDK, View Binding, Fragments*)
- **SATS Arrow Singapore Air Terminal Services** (40 days)
App to capture ULD images for cargo monitoring.
Integrated CameraX, Room DB & JWT authentication. (*Kotlin, Java, Retrofit, Glide*)
- **iSMART Indian Oil (Delhi HQ)** (120 days)
Designed and developed onsite for Zebra Android Devices at Indian Oil Refinery (Paradip, Orissa) & Panipat warehouse. Scan RFID tags & Barcodes on wooden pallets containing polymer bags. Inventory management passed to EWM and YAS modules. Truck load start/stop handled via app.
(*Kotlin, MVVM, Room, Zebra SDK, Retrofit, View Binding*)
- **BLETMS (Bluetooth Track Management System)** (35 days)
Integrated Bluetooth Low Energy. Connect BLE device, scan tag to locate, ring device, and check power status.
(*Kotlin, Jetpack Compose, Hilt, MVVM, Zebra SDK*)
- **Pax Exit System** (20 days)
Designed for Bangalore Airport officers to manage passenger exit from various security zones.
(*Kotlin, Zebra SDK, MVVM, Room, View Binding*)
- **Prohibited Baggage System** (20 days)
Designed for Bangalore Airport officers to record prohibited items in passenger baggage by scanning boarding passes. (*Kotlin, Zebra SDK, MVVM, Room, View Binding*)

Intuition Payment Systems

Mar 2022 Sep 2022

Software Developer

Bengaluru

- Developed expense modules & dashboard UI for IVEPOS (Cloud-based POS system)
- Backend development using Java, Spring MVC 5.4, MySQL, and Hibernate
- Technologies: Java, Spring MVC, Bootstrap, HTML5, JavaScript, MySQL

EDUCATION

Magadh University, Bihar, Patna

Bachelor of Science in Computer Application (B.Sc. IT)

BSEB Bihar, Patna

Senior Secondary Certificate Examination

BSEB Bihar, Patna

Secondary Certificate Examination

TECHNICAL SKILLS

Core Android Development: Android SDK, UI design with XML and Jetpack Compose, Material Design implementation, View Binding, Data Binding

Programming: Kotlin (primary), Java, Object-Oriented Programming (OOP)

Architectures: MVC, MVVM, Dependency Injection using Hilt

Networking & API Integration: RESTful API integration using Retrofit, API testing with Postman

UI/UX Design: Material Design components, animations, custom views, and user interaction design

Concurrency: Kotlin Coroutines, Android Services (background), Broadcast Receivers

State Management & Databases & Storage: Room (SQLite ORM), Shared Preferences, internal and external storage

Tools & Libraries: Glide, Picasso, Retrofit (networking), Bluetooth, Google Maps SDK, ML Kit, GitHub

Cloud & Backend Integration: Firebase Authentication, Firebase Analytics

Device Capabilities Integration: Bluetooth API, GPS and location services, RFID/Barcode/QR code scanners (Zebra & Honeywell)
